(54) Title: PROCESS FOR FINISHING THE SURFACE OF AN ARTICLE AND ARTICLE THUS OBTAINED

(57) Abstract: In the process according to the invention, an article is subjected to a surface finishing operation by means of flocking treatment, avoiding any painting, polishing, smoothing and/or similar operations. The flocking operation essential consists of a superficial laying of natural and/or synthetic fibres or microfibres on the article to be finished, previously coated with adhesive or the like. The building and furnishing article, obtained from recycled materials by means of the process according to the invention, has a surface coating formed by a uniform layer of fibres or microfibres fixed to the article itself and constituting a covering jacket.
